

press release

docdata distributes for Digital Stores

docdata and Digital Stores Ltd have signed an exclusive agreement for ecommerce fulfilment to cover the entire Digital Stores character brand portfolio.

Digital Stores initiated a search for an alternative fulfilment provider as their dynamic growth indicated a more scalable solution was required. The fulfilment operation will be run from the docdata centre in Witney, Oxfordshire, with products stored and distributed from the recently expanded warehouse space.

Tony Matthews, Operations Director at Digital Stores says “docdata emerged as clear winners in a competitive bidding process and we’re excited to be working with them”.

Andy Reedman, Chairman docdata UK “We are delighted to be working with such an exciting business as Digital Stores and look forward to supporting them as they roll out their ambitious growth plans for the future”.
